Dataset Ideas

Adam Pickeral

<u>Datasets</u>

[Roboflow Website Screenshots](#)

- 1206 images of popular website screenshots
- Images are segmented and labeled with various tags. Examples:
    - Button
    - Field
    - Heading
    - Image
    - Text

 Pros:

- Segmented / labeled data is hard to come by. This is well segmented and labeled

Cons:

- Operating System independent. There is no indication as to whether screenshots were taken on Mac, Windows, or other

[Manually Creating a Dataset](#)

This dataset was scraped by me and currently contains 32 MacOS desktop screenshots, 33 images from Windows 10, and 38 from Windows 11.

Pros:

- Screenshots are separated by categories of OS

Cons:

- Limited data: more is needed to be scraped
